COMPACT
VERSATILE
INEXPENSIVE

FOR SEWAGE AND INDUSTRIAL WASTE INSTALLATIONS,
MUNICIPAL WATER SUPPLY AND IRRIGATION SYSTEMS

► PROVIDES GRAPHIC FLOW RECORDS IN MGD
► INDICATES FLOW AND TOTALIZES VOLUME

Float operates conversion cam to provide recording and indicating in MGD to a uniform scale through a wide variety of measuring weirs and flumes. Continuous strip chart driven by 8-day spring clock motor or AC motor. Choice of 30 to 180-day chart speeds. Volume of flow registers in gallons on 7-digit totalizer.

STEVENS total flow meter MODEL 61R

ACTUATES SEWAGE SAMPLER.

Optional actuating switch provides contact closure proportionate to flow for operation of sewage sampler or other device.

Specialists in Hydrologic Instruments Since 1907

Vulcathene®...the lowest-cost way to drain corrosive wastes

Users report Vulcathene costs up to 40% less to buy and install than any other acid-resistant drainline material. And that's just the beginning. You save maintenance costs, because Vulcathene is made of virgin polyethylene—acid-proof, alkali-proof, scale-proof, clog-proof, shatter-proof. You save replacement costs because Vulcathene is good for the life of the building, plus new additions are easily tied in. Ask for our complete new Vulcathene catalog of sinks, traps, fittings and pipe, in sizes from 1/2" to 6". Just write Dept. 3618.

WATCHMASTER EMERGENCY LIGHTS

**specified by
HOWARD JOHNSON'S
engineers because . . .**

a fire in a Howard Johnson's restaurant in Boston proved the reliability of Watchmaster lights.

Of the five makes of emergency lights installed in this restaurant, only the Watchmaster worked when the power failed. After testing every make of emergency lights, Howard Johnson's engineers specified Watchmaster for all new installations.

Make sure you specify the most dependable emergency lights on the market. Specify Watchmaster.

Write for free catalog and booklet, "How to Select Emergency Lighting", or see our catalog in the 1962 SWEET'S ARCHITECTURAL FILE.

NEW! Automatic combination gear drive **JOHNSON** *Redi-Torq*®

Redi-Torq combination right angle gear drive with automatic clutch, eliminates manual switch-over to engine drive in case of power failure. Drive couples to engine by flexible shafting or couplings—engine clutch unnecessary. Engine may be tested without interfering with electric motor operation of pump.

For round-the-clock protection against power failure in water, sewage and fire installations. Developed and proven in municipal and industrial use over several years.

Sizes: 15 to 200 hp; hollow or solid shafts. Write for engineering catalogs.

Batch Weighing
Accuracy
without Compromise*

SUSPENDED HOPPER SCALE

TILT HOPPER SCALE

PLATFORM SCALE

Dynabatch—the most accurate systems in the industry are definitive to 0.025% of full scale, repeatable to 0.010%, and sensitive to 0.008%. Binary-coded poise weights handle 1-10,000 lbs., assure easy adaptability to computer control or monitoring and remote digital batch setting. The Dynabatch suspension system employs flexures, unique frictionless pivots, which prevent seizing, corrosion, and balance arm load-up, and permit operation in hard atmospheres.

EXOLON Anti-Slip
troweled into concrete

makes it **SAFE -**
WET or DRY

Exolon Anti-Slip abrasive grains are easily troweled into the surface of concrete to give it hardness and wear resistance. It never polishes smooth even in heaviest traffic. LOW COST. Anti-Slip is available in Aluminum Oxide or Silicon Carbide grains. The latter adds sparkle and glitter. Both bond with cement producing safe, non-slip surfaces.

EXOLON ANTI-SLIP abrasive grain may be bonded to wood, metal or concrete surfaces by first applying an epoxy resin, then sprinkling the abrasive on before the resin hardens.
